

Application Specialist

The Company

TeeJet Technologies is a subsidiary of Spraying Systems Co., a U.S. based multi-national company with more than 80 years of growth, market leadership, diversification, and stability. We specialize in the engineering, manufacturing, and marketing of precision spray nozzles, valves, accessories, control systems technology and application data management tools.

Position Overview

TeeJet Technologies is searching for an Application Specialist to join our team helping support our broad line of fluid delivery to the agricultural industry. As a member of a fast-paced and talented team, you will be an integral part of our support network assisting our sales organization and customer base. This position is based at our corporate headquarters in Wheaton, IL.

Description

As Application Specialist, you will work closely with internal and external engineers and product specifiers to assist in product support related activities. In addition, the Application Specialist will work closely with the management and marketing groups to support our growth initiatives.

Responsibilities

- Providing technical information and assistance on a broad range of products to sales representatives, customers, vendors, team members and production departments as required
- Investigating customer complaints or requests and reporting results and possible recommendations
- Creating product support documentation and technical support literature
- Assembling sales data for analytical and business development purposes
- Assisting Product Engineering with the documentation of products specifically modified for customers
- Setting up, performing, and reporting on a wide variety of laboratory tests on a broad range of products. This includes both company and competitive products
- Travelling occasionally to visit customers, sales offices and attend trade shows
- Assisting in conducting product related training for sales representatives and customers
- Supporting company goals and objectives
- Working closely with other team members on day-to-day functions
- Working with other market development teams on related projects as necessary
- Accepting additional responsibilities as assigned by the Team Leader

Minimum Qualifications

- Bachelor's Degree in a related field including but not limited to Ag Engineering / Ag Technology
- Ability to communicate clearly and concisely, both verbally and written
- Ability to travel approximately 25%
- Ability to make professional presentations to audiences with varying degrees of product or market knowledge
- Proficient in Microsoft Office Suite, with 3D rendering and CAD file management being a plus
- Willingness to learn additional software, fundamentals of manufacturing processes, etc.
- Ability to function effectively within a team environment

Preferred Skills & Qualifications

- Experience or understanding with the application of crop protection chemicals and fertilizers.
- General understanding of field crop, orchard, vineyard and/or turf related spraying applications
- General understanding of general agronomic principals and agricultural practices would be a plus
