

SCM PRO UPDATE

The SCM Pro needs to be updated to v4.4.34165 to address the GPS Week rollover issue detailed in bulletin 98-01552. (These are SCM Pros that shipped from TeeJet Technologies prior to January 1st, 2019.) Updating the SCM Pro takes approximately 8 minutes.

NOTE: It is critical that the machine's batteries are fully charged so the update can complete without interruption. If the machine has not been run for a while it is recommended to start the machine and charge the batteries before proceeding with this update.

To update:

1. Download the file "unipilotpro-fieldpilotpro_ecu-s1-v4434165.zip" from <http://teejet.it/english/home/tech-support/softwarefirmware-updates/guidance-and-steering/fieldpilot-prounipilot-pro-release-management.aspx>.
2. Unzip the update file 'ECU-S1-v4.4.34165.tgz' to a known location on the PC to be used for the update.
3. Make sure that the PC is not connected to any network by any connection method during the update process.
4. Connect cable 45-05996 (see system diagram) to the Ethernet port on the PC.

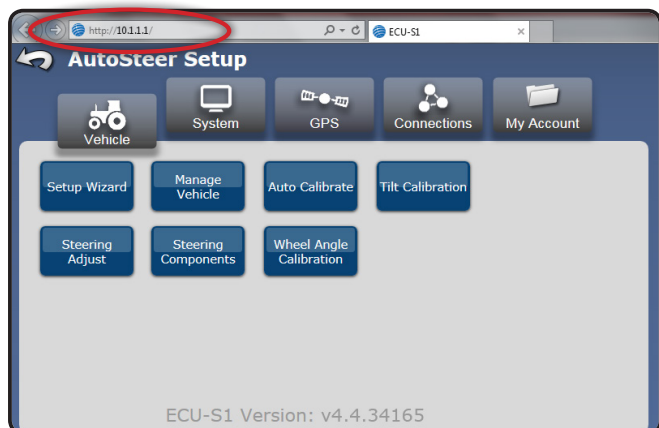

NOTE: The SCM Pro does have a Wi-Fi connection option, but using Wi-Fi is not recommended for firmware updates.

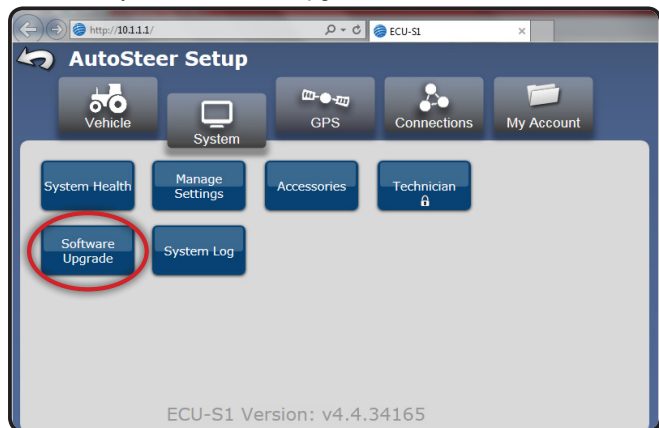

UPDATE INSTRUCTIONS

5. Power on the SCM Pro, and in an Internet Browser on the PC navigate to <http://10.1.1.1>

NOTE: Not all internet browsers support this update. Google Chrome and Mozilla Firefox are supported. Microsoft Internet Explorer and Microsoft Edge browsers are not supported and should not be used.

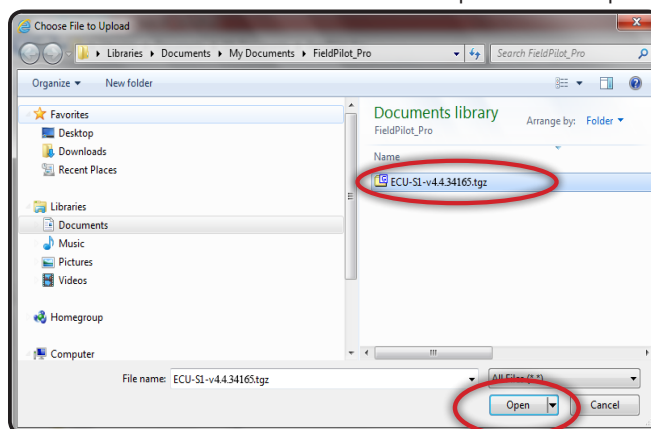

6. Go to System->Software Upgrade

7. Click on the 'Browse...' button to open a browser window

8. Select the v4.4.34165 files as saved in Step 1 and click 'Open'

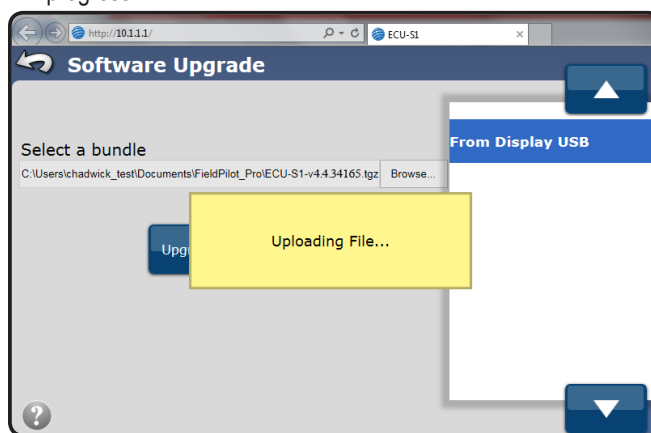

9. Click on the 'Upgrade' button to start the update process.

WARNING: It is absolutely critical that the update process is allowed to complete without disruption to the Ethernet connection or power to the SCM Pro. Do not start or stop the vehicle once the update has started, and do not work on any other electrical systems on the machine until the update has completed.

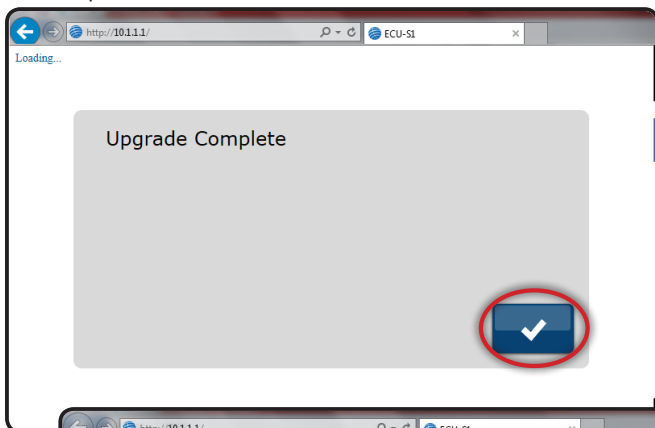

10. Several screens like the following will advise of the update progress.

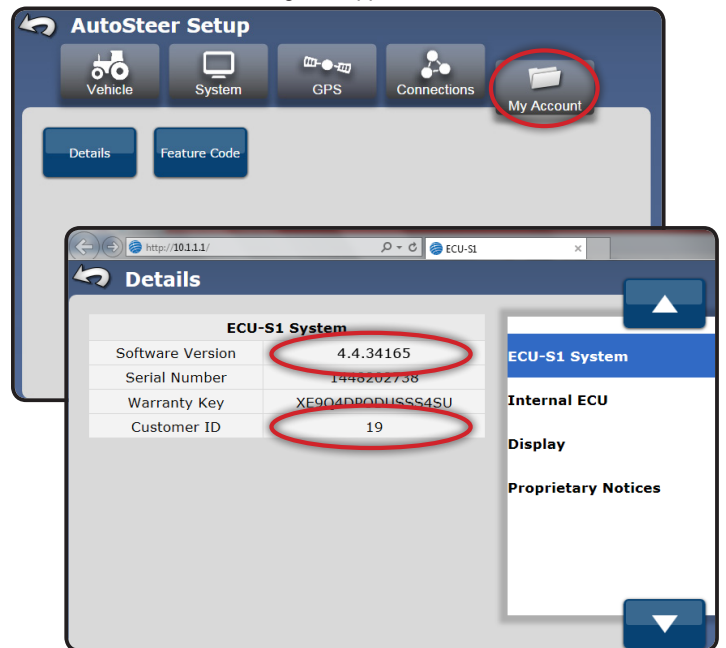

11. At the end of the update process, the SCM Pro will reboot.

12. The following screen advises that the update is complete. Click on the 'Check Mark' button  to return to the Vehicle Setup screen.

13. Go to My Account->Details and verify that the Software version is reported as '4.4.34165' and that the Customer ID is reported as '19'. If both of these are not correct please contact TeeJet Technologies Support.

14. The update is complete.
