

SPRAY PRODUCTS FOR DRONE APPLICATIONS

SPRAY TIPS

TeeJet spray tips are specifically engineered to deliver precise and effective pesticide application products. Designed with advanced features, they ensure optimal droplet size, spray pattern, and coverage. Whether you need flat fan, cone, or specialized tips for specific applications, TeeJet offers a comprehensive range to meet your unique spraying requirements. These spray tips are compatible with drone sprayer systems, allowing for efficient and accurate pesticide distribution.

NOZZLE BODIES

TeeJet nozzle bodies are designed to seamlessly integrate with drones, facilitating the connection of spray tips and enabling efficient fluid flow and control. With precision engineering, these nozzle bodies enhance the performance and reliability of pesticide applications. By eliminating threaded fittings and other components, plumbing system complexity is reduced and reliability is improved.
