

THE WIDEST RANGE OF PWM COMPATIBLE SPRAY TIPS – ONLY FROM TEEJET

OPERATING A PULSE WIDTH MODULATION (PWM) TIP CONTROL ON YOUR SPRAYER?

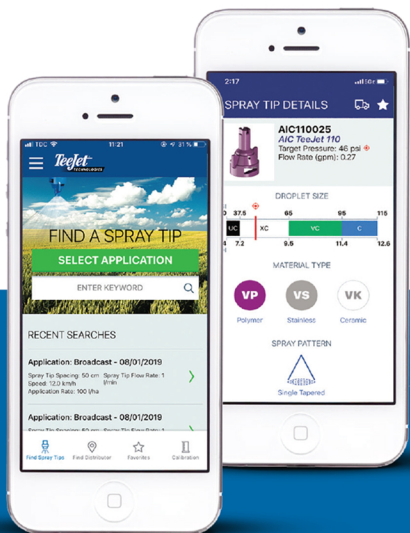

If so, you may be surprised at the number of spray tip choices, including air induction designs, that TeeJet has to offer. This family of eight tips covers the full droplet size spectrum and a very wide range of flow capacities.

WHAT MAKES A TEEJET TIP PWM APPROVED?

A combination of field and laboratory testing that confirms the following:

- Skip-free, consistent application in the direction of travel
- Excellent spray distribution across the boom width
- Rapid and complete spray pattern formation
- Consistent droplet size

All of which adds up to thorough coverage, proper drift management and effective pest control.
