

SCM PRO UPDATE

The SCM Pro needs to be updated to v3.2.32197 to be compatible with console v4.20. (These are SCM Pros that shipped from TeeJet Technologies prior to March 28th, 2016.) Updating the SCM Pro takes approximately 8 minutes.

To update:

1. Save the update file 'ECU-S1-v3.2.32197.tgz' to a known location on the PC to be used for the update.
2. Make sure that the PC is not connected to any network by any connection method during the update process.
3. Connect cable 45-05996 (see system diagram below) to the Ethernet port on the PC.

NOTE: The SCM Pro does have a Wi-Fi connection option, but using Wi-Fi is not recommended for firmware updates.

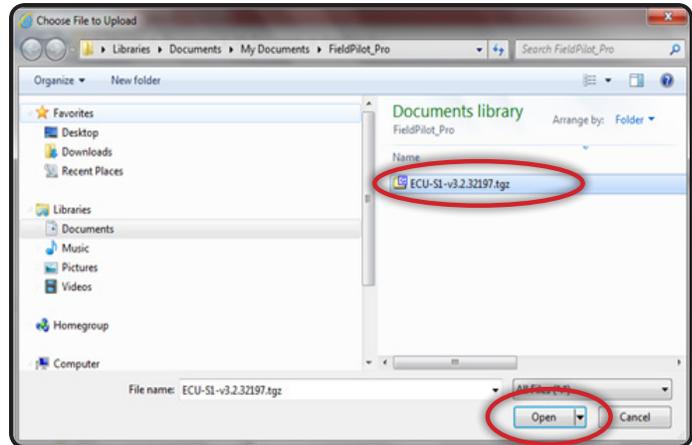

UPDATE INSTRUCTIONS

4. Power on the SCM Pro, and in an Internet Browser on the PC navigate to <http://10.1.1.1>

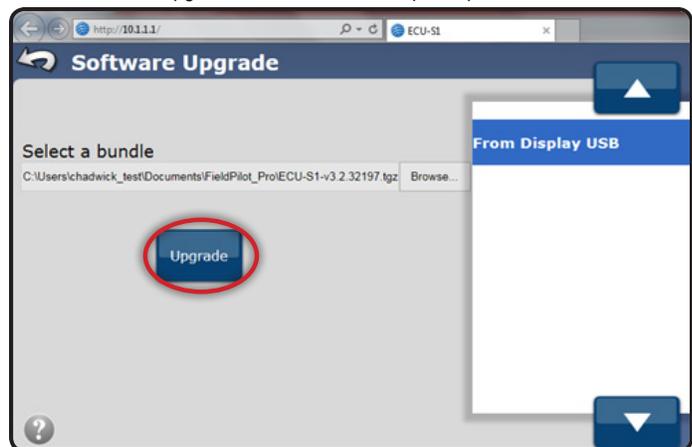

7. Select the v3.2.32197 files as saved in Step 1 above and click on 'Open'

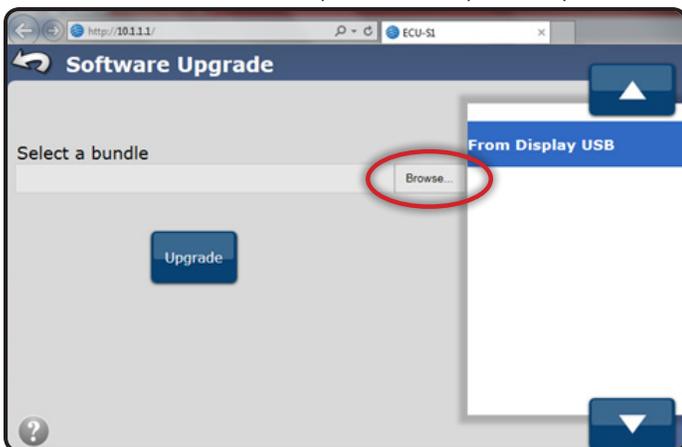

5. Go to System->Software Upgrade

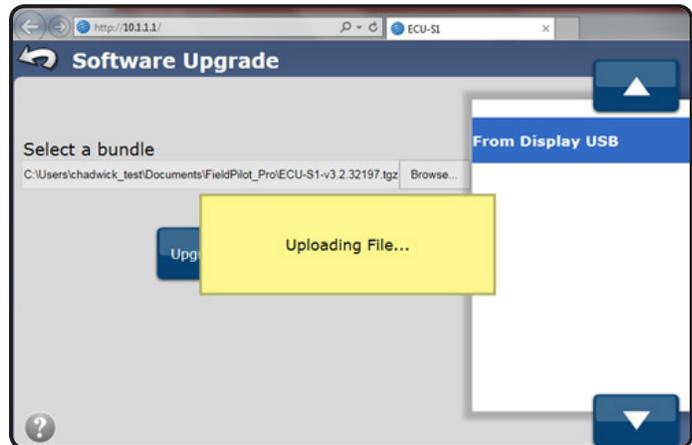

8. Click on the 'Upgrade' button to start the update process

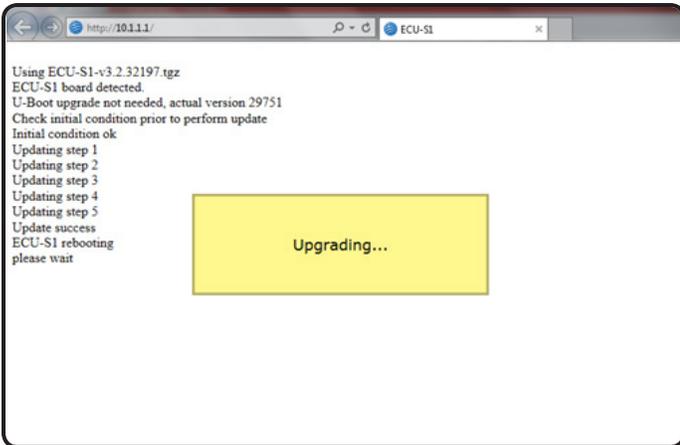

6. Click on the 'Browse' button to open Windows Explorer or equivalent

9. Several screens like the following will advise of update progress

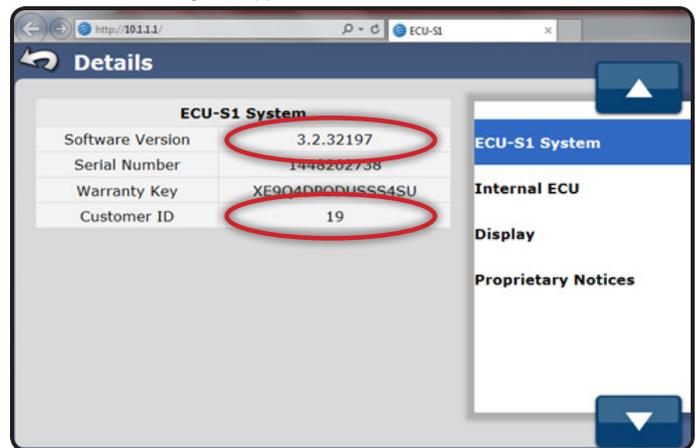

10. At the end of the update process the SCM Pro will reboot

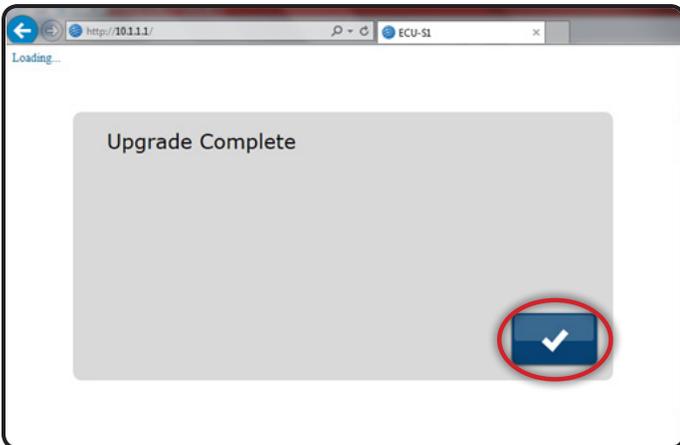

13. Go to

My Account->Details and verify that the Software version is reported as '3.2.32197' and that the Customer ID is reported as '19'. If both of these are not correct please contact TeeJet Technologies Support.

11. The following screen advises that the update is complete. Click on the 'Check Mark' button .

14. The update is complete.

12. The system will return to the following screen.
